

# **Spirometry Module at Ulster University**

**commencing 28th September 2021**

With the increasing incidence of respiratory disease, assessment of respiratory function is a vital skill for healthcare professionals, particularly those working in primary care. This stand alone module prepares primary care nurses to competently carry out spirometry and interpret spirometry readings under the supervision and support of a highly experienced teaching team.

- ⇒ Learning through lectures, group work and practical work
- ⇒ Assessment by coursework and practical assessment
- ⇒ Course dates as follows:

**Day 1** Tuesday 28th Sept

**Day 2** Tuesday 5th Oct

**Day 3** Tuesday 12th Oct

**Day 4** Practical exam Tuesday 19th Oct

**Day 5** Tuesday 16th Nov

**Portfolio submission** date Tuesday 14th Dec

Please Note: All 5 days must be attended

There are a limited number of fully funded places available for nurses employed in Primary Care. If you wish to be considered for one of these places, please send you details to Gillian McCorkell as per email below no later than **23 July 2021**.
